# Children's Programs

## 1. Before Blue Jeans and Reeboks

Take an insightful look into children's fashion history. A narrated slideshow takes students on a trip through history by the seat of their pants. Students will then make their own bonnet or crown.

## 2. The Built Environment

An architecture work-booklet walks students through the periods and styles of buildings that make Waco distinctive. Create your three dimensional dream house using the elements learned. Then place your house in a community context using an 1873 map of Waco.

## 3. The Great Indoors

Explore the evolution of mankind's quest for comfort. This PowerPoint presentation is accompanied by a time line activity that encourages creative thinking. Furniture truly makes the indoors great.

## 4. How did Waco Grow?

Discover the evolution of Waco through map activities. Historic reproduction maps from 1873 and 1886 are combined with modern maps to demonstrate growth and expansion. Students are challenged to explain causes and patterns of growth. Relationships are established between their home's location, landmarks, and other places of interest.

## 5. Transportation: Trains, Planes, and Automobiles

Track migration patterns and the methods of transportation favored during certain periods during the building of Waco. A puzzle accompanies the discussion. If presentation is on a HWF site the Waco Parks and Recreation Department Mounted Patrol may also be scheduled to visit on the continuing service of the horse.

## 6. Santa— How You've Changed

Grades: 1 - 8

Santa is America's favorite holiday icon, but hasn't always been the "jolly old elf" we all know. Learn the history of Santa in America and his development into who he is today.
